PROFESSIONAL SUMMARY

Bachelor's Degree graduate in Informatics from Universitas Muhammadiyah Malang with a GPA of 3.77/4.00, specializing in web development and UI/UX design. Experienced as a Web & Data Support Training Program Intern at the Batu City Department of Manpower, contributing to Laravel-based system development through the implementation of 5 core modules, as well as managing and validating 597 participant records categorized into 9 training programs to improve system efficiency. Skilled in frontend development (Laravel, Bootstrap, React.js) and UI/UX design using Figma to create responsive and user-friendly interfaces. Supported by a portfolio of web and mobile projects, a Full Stack Open certification from the University of Helsinki, a SINTA 3-indexed publication, and Copyright Registration No. 001077149 (2026), with strong competencies in Frontend Development, Web Development, and UI/UX Design.

EDUCATIONAL BACKGROUND

UNIVERSITAS MUHAMMADIYAH MALANG, INDONESIA

September 2022 – May 2026

Bachelor's Degree in Informatics (GPA: 3.77/4.00)

- **Thesis Title:** Development of the Network Information System for the Workforce Service Office of Batu City Using the Prototyping Method.
- **Software Skills:** GitHub, VS Code, Microsoft Excel, Microsoft Word, Figma, Canva, MySQL, phpMyAdmin, MongoDB, HTML, CSS, JavaScript, PHP (Laravel), React.js, and Node.js.
- **Field of Study Interest:** Software Engineering.
- **Languages:** English (Beginner).

SKILLS & COMPETENCIES

- **Web Application Development (PHP & Laravel):** Developed and integrated web application modules, including account management, training management, document management, verification, and reporting systems in a structured manner.
- **Data Integration & Frontend-Backend Coordination:** Managed data integration between frontend and backend systems using MySQL while ensuring system data consistency and reliability.
- **User Experience (UX) Optimization & System Flow Design:** Optimized system workflows (user flow) to create more structured and intuitive training, verification, and reporting features, improving overall usability.
- **Frontend Development & UI Implementation (Laravel, Bootstrap):** Developed responsive and user-friendly user interfaces (UI) using Laravel and Bootstrap, including authentication, registration, and document management features.

WORK EXPERIENCE

BATU CITY DEPARTMENT OF MANPOWER

July 2025 – September 2025

Web & Data Support Training Program – Internship

- Developed Laravel-based SiJoker system features, including user authentication, training registration, document upload, verification, and data management using Laravel, PHP, and MySQL.
- Implemented 5 core system modules covering account management, training management, document management, verification, and reporting, improving training data integration and operational efficiency.
- Processed and validated 597 participant records using Google Forms and Microsoft Excel through data grouping, document verification, and duplicate data elimination to ensure data accuracy.
- Classified participant data into 9 training programs to streamline selection, verification, and interview scheduling processes in a more structured manner.
- Utilized Microsoft Excel functions and features such as sorting, filtering, conditional formatting, COUNTIF, and VLOOKUP to support systematic participant data analysis and validation.
- Conducted monitoring and documentation of 9 training activities using Microsoft Excel and Microsoft Word with standardized templates and tabular formats to maintain administrative consistency and efficiency.

Tools: Laravel, PHP, MySQL, Bootstrap, Visual Studio Code, Laragon, GitHub, Cypress, Microsoft Excel, Google Forms, Microsoft Word

Key Achievement:

1. Successfully developed the SiJoker system with 5 core modules, creating a more integrated training data management process and reducing duplicate data.
2. Processed and validated 597 participant records, categorized them into 9 training programs, and documented 9 training activities using standardized templates to improve administrative efficiency.

PROJECTS

WORKFORCE NETWORK INFORMATION SYSTEM WEBSITE (SIJOKER) – <https://bit.ly/github-tugasakhir>

- Applied the prototyping method in web system development to manage job seeker and training data using PHP Laravel, MySQL, HTML, CSS, and JavaScript to improve administrative efficiency.

Key Achievement: Successfully developed a web-based training and job seeker data management system that improved administrative efficiency through a prototyping development approach.

BERKAH ELECTRICAL STORE CASHIER & MANAGEMENT WEBSITE – <https://bit.ly/toko-listrik-blitar>

- Developed a web-based POS and inventory management system (React.js, Node.js, MongoDB, Vite) featuring an admin panel, stock monitoring, sales analytics, and digital receipts to improve cashier operational efficiency.

Key Achievement: Successfully built a web-based POS and inventory management system that improved transaction efficiency through real-time stock monitoring, automated reporting, and digital receipt generation.

FLOWBOOST MOBILE APPLICATION – <https://bit.ly/flowboost-app> & <https://bit.ly/flowboost-design>

- Developed a Flutter-based mobile application featuring motivational video content, implemented responsive interfaces, and designed intuitive and user-friendly UI/UX in Figma to enhance user experience.

Key Achievement: Successfully developed a Flutter-based mobile application with motivational video features and responsive, user-friendly UI/UX design, improving user experience and application accessibility.

BERKAH GROCERY STORE – <https://bit.ly/toko-semako-berkah>

- Designed the UI/UX of the “Berkah Grocery Store” website using Figma, focusing on wireframing, prototyping, product page design, and navigation to improve usability and user experience.

Key Achievement: Produced UI/UX designs in Figma (wireframe to prototype) with clearer navigation, improving overall usability and user experience.

HEALTHTALK – <https://bit.ly/healthtalk-design>

- Designed the UI/UX of the “HealthTalk” mobile application using Figma, focusing on intuitive navigation, user comfort, and a modern interface as a digital health discussion platform.

Key Achievement: Successfully designed the “HealthTalk” application UI/UX in Figma with responsive prototypes, intuitive navigation, and a modern interface to enhance user experience.

CERTIFICATIONS

FULL STACK OPEN - UNIVERSITY OF HELSINKI & HOUSTON INC. – <https://bit.ly/sertifikat-fullstackopen>

- Successfully completed the Full Stack Open certification, gaining practical knowledge in modern web development, including React, Node.js, Express, MongoDB, REST APIs, authentication, and application testing.

PUBLICATIONS & CREATIVE WORKS

SINTA 3 INDEXED JOURNAL PUBLICATION – <https://bit.ly/jurnal-polbeng-article>

- Authored and published a scientific journal indexed in SINTA 3, conducting research entitled “*Development of Worker Network Information System at the Batu City Manpower Using the Prototyping Method*” using the prototyping approach for web-based information system development.

DOCUMENT SCANNER & DIGITAL ARCHIVE (SOFTWARE PROGRAM) – <https://bit.ly/hki-okta>

- Registered as a Copyright under the Ministry of Law of the Republic of Indonesia with Registration No. 001077149 (2026), developed collaboratively with a team under Universitas Muhammadiyah Malang.
